PROFESSIONAL SUMMARY

MERN Stack Developer with 1 year of internship experience, focused on building scalable web applications. Strong hands-on expertise in React.js, building reusable components, managing state using Redux and Context API, and integrating RESTful APIs.

Also experienced with backend development using Node.js, Express.js, and MongoDB. Proficient in developing responsive UI with MUI and SASS, Styled component and implementing form handling with React Hook Form and Yup.

WORK EXPERIENCE

Acintyo Tech Innovations Pvt Ltd

B2B Medicine Supply Chain Management Platform

- Used **MUI** for building responsive and consistent UI components like forms, tables, dialogs, and tabs.
- Passed Props data and functions between components, especially for list rendering and modals.
- Used React Hooks like `useState`, `useEffect`, `useReducer`, `Redux` and `useRef` to manage component state, handle side effects, and optimize performance across dynamic forms and data-driven UIs.
- Created reusable components like `InputField`, `TableList`, and `ModalPopup` used across Supplier, Retailer, and Admin panels.
- Used `Axios` inside `useEffect` and action functions to fetch product lists, orders, and user data from the backend.

DocMatrix Hospital Management System

- Used styled component for modular and scoped styling of components across the Super Admin and Hospital Admin panels.
- Created shared components like `ApiServices`, `TableView`, `GridCard`, and `ModalForm` to ensure maintainability and consistency.
- Implemented dynamic filtering for hospitals, doctors, and appointments using controlled inputs and local state.
- Developed a common table layout for listing hospitals, doctors, articles, and transactions.
- Displayed doctors in a responsive grid with React Slick carousel for profile browsing.

Fintech Loan Based Application

- Handled CRUD operations for employee onboarding and loan application status updates using `Axios` and query params. Imaged and deployed machines using standard configuration tools
- Implemented navigation between employee, loan status, and detail views using `react-router-dom`.
- Developed shared components like `FormField`, `StatusCard`, and `Loader` for consistent layout and behavior.

SKILLS

Front End	HTML, CSS, Bootstrap, SASS, LESS, Styled component, MUI
Tools/Library	React js, Javascript, Typescript, JQuery, PostMan, Mongo Compass
BackEnd	Node js, Express js
Databases	MongoDB, SQL
Other Skills	JSON, AJAX, XML, GITHUB, Bitbucket

EDUCATION

Master in Computer Application(Utkal University)

2022-2024

- GPA: 8.25
